

* Omicron -Astrological point of view *

The World Health Organization said the overall global risk associated with the new corona virus type of anxiety, Omicron, was "very high". As Omicron cases are found in different parts of the world, many countries have imposed travel bans on high-risk countries. In India, Union Civil Aviation Minister Jyotiraditya Scindia said the situation was being closely monitored in terms of resumption of commercial international flights. India also offered its support to countries already affected by Omicron in terms of vaccines and medical kits.

The issue of a new variant of the Corona found in South Africa has caused a stir around the world. The World Health Organization (WHO) has named this variant Omicron. Two people from South Africa to Karnataka have tested positive for corona and their samples have been sent for genome sequencing lab testing. After South Africa, Hong Kong and Botswana, countries around the world are now wary of controlling the Omicron variant in Britain and Germany, and RT-PCR testing of foreign travellers is underway. A list of 47 countries has been released by the Union Ministry of Health of India from which tourists will be tested even if they have taken both doses of the vaccine.

Astrologically, corona viruses have been recounted frequently in the last two years, most notably the grazing orbit of Saturn in Capricorn, which has re-emerged as an omicron.

From the astrological point of view about Omicron, it can be said that there is a need to be cautious till April 29, 2022. Saturn's entry into Capricorn on January 24, 2020 marked the beginning of the Corona virus and the first and second wave during its curved orbital pasture orbit. Since Saturn still orbits Capricorn by April 29, 2022, caution will be required until April 29, 2022, when the third wave in the form of Omicron started from South Africa. In addition, the possibility of a fourth wave during this time cannot be ruled out as Saturn enters Capricorn from 17th July 2022 and stays till 17th January 2023. The omicron form of corona virus may be more effective after 12 July 2022.

Observing from the point of view of astrology, it can be said that in the year 2022, there is a need to be careful with the Omicron variant. The variants found in Africa are the most dangerous as they have the most mutations. **The time till 29 April 2022 and 12 July 2022 to 17 January 2023 in which special care will be required especially during 12 July 2022 to 23 October 2022.**

In short, the period till 29 April 2022 and 12 July 2022 to 23 October 2022 may be affected by the new corona virus Omicron, and during this time people must adhere to government guidelines.
